Results-oriented Software Engineer with B.S. in Electronics Technology from A&T State University, with experience in complete software development lifecycle, including requirements, design, development, and maintenance.

Work History

NTT Data Services- *AEM Developer, Charlotte, NC*

Jan – Jul 2023

- Developed custom components that were used to author web pages.
- Created AEM dialogs used to dynamically change elements of components i.e. images, text, titles etc.
- Developed website templates for authors to scale faster to customer demands.
- Daily stand-ups to provide insight on progress made on assignments, and to problem solve team issues.

NTT Data Services- *SAP Cloud Architect, Charlotte, NC*

Jan – Dec 2022

- Worked on engagement for the state of Arkansas. Where I managed user access and system downtimes.
- I oversaw taking weekly back-ups of our internal SAP systems to ensure data integrity and system access 24/7.
- Deployed a 3-tier SAP system that was used to manage and test large amounts of data before being move to a production system.

NTT Data Services- *Digital Technology Junior Analyst, Charlotte, NC*

Feb – Dec 2021

- Developed and tested configuration scripts that ensured functionality, used for lesser time to scale on client engagements.
- Created process maps use to provide client easier navigation and implementation of systems tests.
- Tasked with continuous learning, where I had to cultivate my skills in order to provide more value to the company.
